Mt. Washington Pediatric Hospital's Physical Medicine and Rehabilitation

Mt. Washington Pediatric Hospital's outpatient Physical Medicine and Rehabilitation services (also known as Physiatry) aim to enhance and restore functional ability and quality of life to patients with physical impairments or pediatric onset disabilities. Our Physiatrists provide comprehensive evaluation and management of the medical and physical problems associated with diagnoses including but not limited to:

- Amputations/limb deficiencies
- Balance issues
- Brachial plexus palsy
- Brain injury/concussion
- Burn/wound care
- Cerebral palsy
- Chronic pain
- Developmental delay
- Developmental coordination disorders
- Gait issues/toe walking
- Multiple trauma
- Muscle tone abnormalities
- Neuromuscular disease
- Prematurity
- Spasticity and Movement Disorders
- Spina bifida
- Spinal cord injuries
- Sports injuries
- Torticollis

After a detailed assessment of a patient's needs, the physiatrist will provide medical intervention resulting in the possible prescription of rehabilitation therapies, medications, exercise/activity participation, and/or adaptive equipment.

Services available include but are not limited to:

- Diagnostic musculoskeletal ultrasound
- Electro diagnostic testing
- Management of intrathecal baclofen pump
- The Ness H200 Hand Rehabilitation System
- The Ness L300 Foot Drop System
- Rehabilitation services management
- Spasticity clinic assessments
- Botox® injections

Mt. Washington Pediatric Hospital's Pediatric Physical Medicine and Rehabilitation Services are available at our Baltimore and Cheverly locations. To schedule an initial appointment, please call **410-367-2222**.
